OBJECTIVE

A seasoned Product Manager with over 10 years of experience in product management. Demonstrated success in leading product strategies and advanced analytics solutions resulting in increased market share and revenue growth. Skilled in AI solutions, cross-functional collaboration, and agile methodologies. Committed to driving innovation and excellence in the financial technology industry.

EXPERIENCE

Major Financial Institution   2023-2024
Vice President   New York, NY

- Successfully led the development and launch of a new digital banking platform, demonstrating strong product lifecycle management skills and resulting in a 30% increase in customer acquisition within the first six months.
- Implemented an effective customer feedback loop, showcasing excellent communication and stakeholder engagement skills, which improved customer satisfaction scores by 20% and reduced churn rate by 15%.
- Spearheaded a cross-functional team to integrate blockchain technology into payment systems, proving strong collaboration and innovative product strategy skills, and reducing transaction times by 40%.

Consulting Firm   2020-2022
Management Consultant   New York, NY

- Led the design and execution of a digital transformation strategy at a major retail bank, resulting in a 50% increase in online transactions and a 20% reduction in operational costs. This experience demonstrates my ability to develop and execute product strategies that align with business objectives and market needs.
- Facilitated strategic workshops with senior executives to align on priorities, creating a unified roadmap and enhancing project execution. This reflects my capability to collaborate with cross-functional teams and drive product vision.

Financial Services Company   2019-2020
Product Manager   New York, NY

- Successfully launched a personal finance mobile app, achieving 100,000 downloads within three months and a 4.8-star rating, demonstrating the ability to manage product lifecycle and drive product success.
- Collaborated with data scientists to develop predictive analytics models, significantly improving customer targeting and increasing conversion rates by 25%, showcasing expertise in advanced analytics and cross-functional collaboration.

Financial Services Company   2018-2019
Data Scientist   New York, NY

- Led the development and deployment of a recommendation engine for personalized financial advice, resulting in a 35% increase in user engagement.
- Conducted advanced data analysis to identify fraud patterns, reducing fraudulent transactions by 15% and achieving $2 million in annual savings for the company.
